# CARGOSORB

All CARGOSORB products feature a series of bags filled with a moisture-absorbing granular filling. The granules transform absorbed moisture into a leak-retardant gel.

**CARGOSORB:**  
Bag of granules before and after exposure to moisture

*CARGOSORB-Pole: consistently high absorption rate*

The front side of the series of interior bags is made from a fibrous, permeable membrane which lets moisture pass through. The rear side is made from a waterproof film which means that CARGOSORB products, unlike those from other manufacturers, can be placed directly on top of the goods that need moisture protection.

Our newest development, the CARGOSORB pole, is able to absorb up to 4 litres despite its compact size of only 106 cm total length, and features a trapezoidal design, which has been optimised for the corrugated wall of a container.

**Pole:** absorbs up to 4 litres of moisture with a length of only 106 cm

CARGOSORB is available in the following versions:

			
<p><b>POLE 1200</b></p> <p>12 bags Vertical pole Length: 106 cm Weight: 1,200 g</p> <p>Features an optimised trapezoidal design</p>	<p><b>BLANKET 2000</b></p> <p>20 bags Blanket ca. 60 x 110 cm Weight: 2,000 g</p> <p>Can be placed on goods</p>	<p><b>CLASSIC 1200</b></p> <p>12 bags Vertical series of bags Length: 200 cm Weight: 1,200 g</p> <p>Fits into the corrugation of the container wall</p>	<p><b>CLASSIC 600</b></p> <p>6 bags Vertical series of bags Length: 100 cm Weight: 600 g</p> <p>Fits into the corrugation of the container wall</p>
